# ADAC Car Rental

## Rental

Operation of the company's own rental car fleet with up to 5,000 vehicles across around 250 rental locations throughout Germany.

ADAC  
Clubmobil

## Rental

Cooperation with globally leading quality providers in over **86 destinations** at more than **8,000 locations** worldwide.

Over **2,500 ADAC motorhomes and 400 caravans** are managed by our licensees **at more than 90** rental locations.

We arrange a total of around **800,000 vehicles per year** via our rental portal.

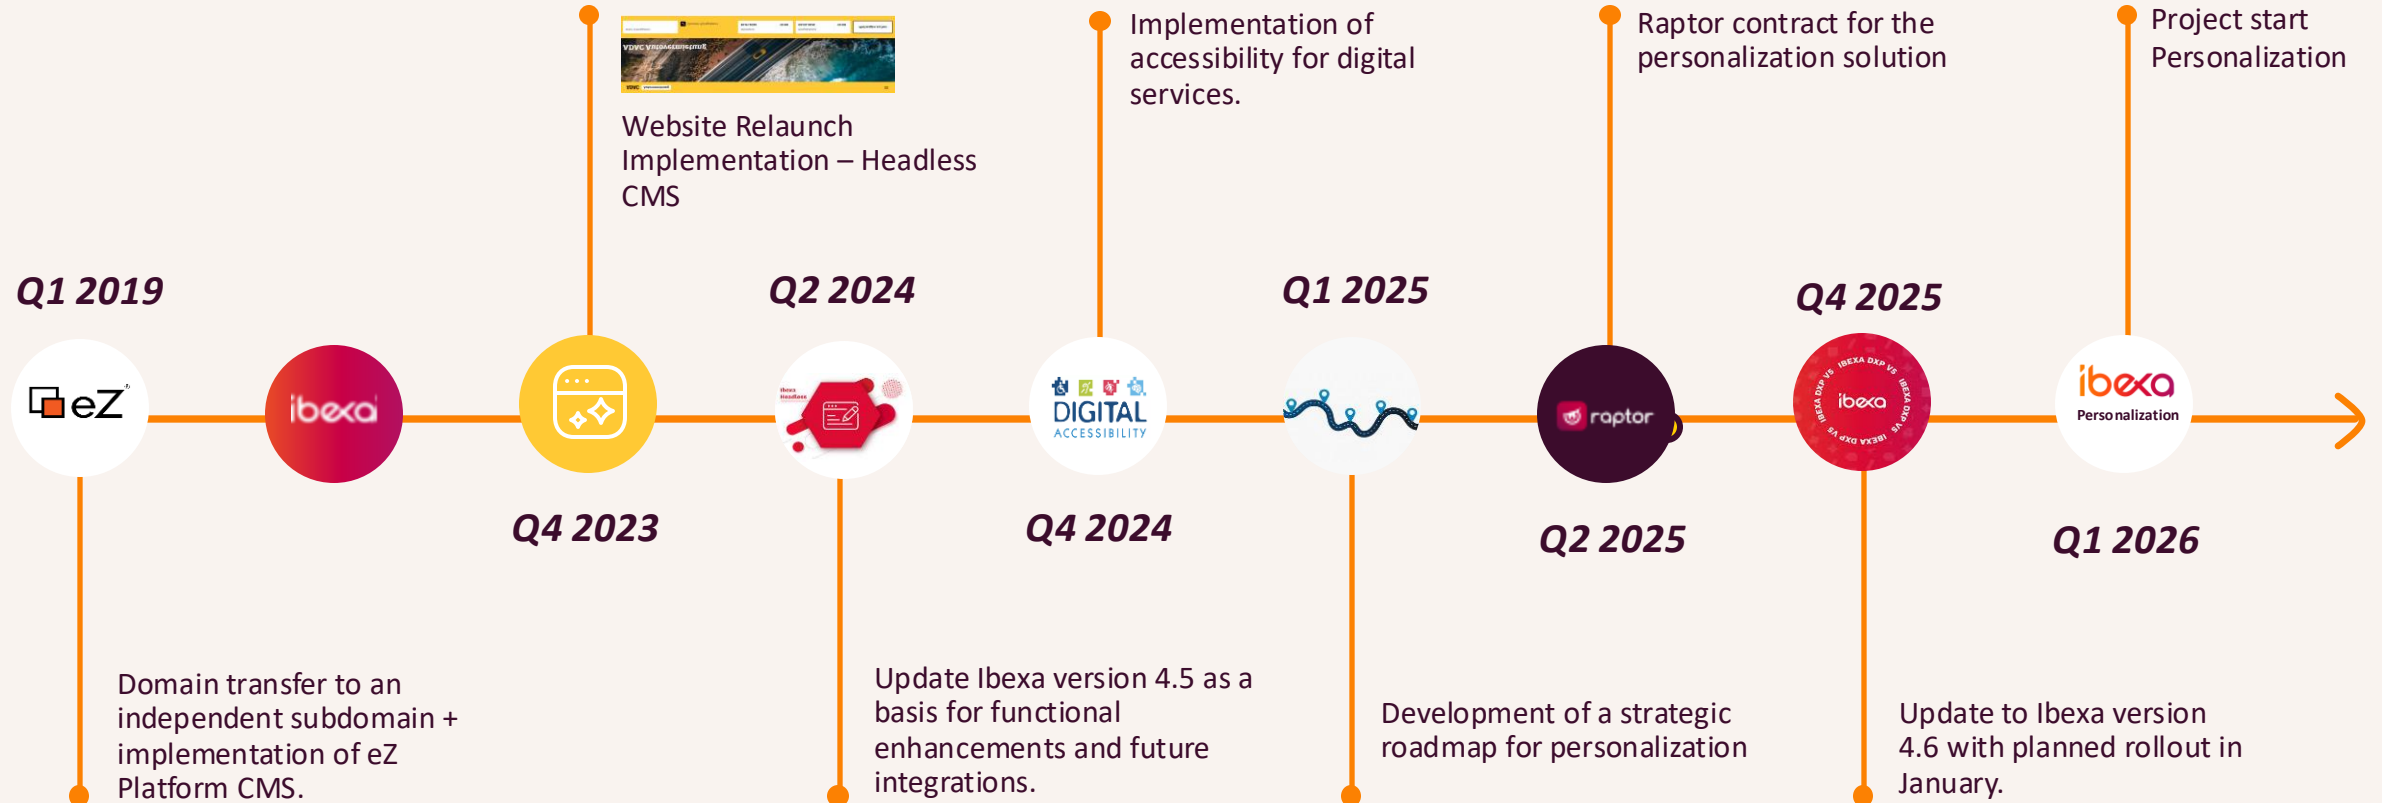

## World of Vehicles

Car Leasing with ADAC benefits

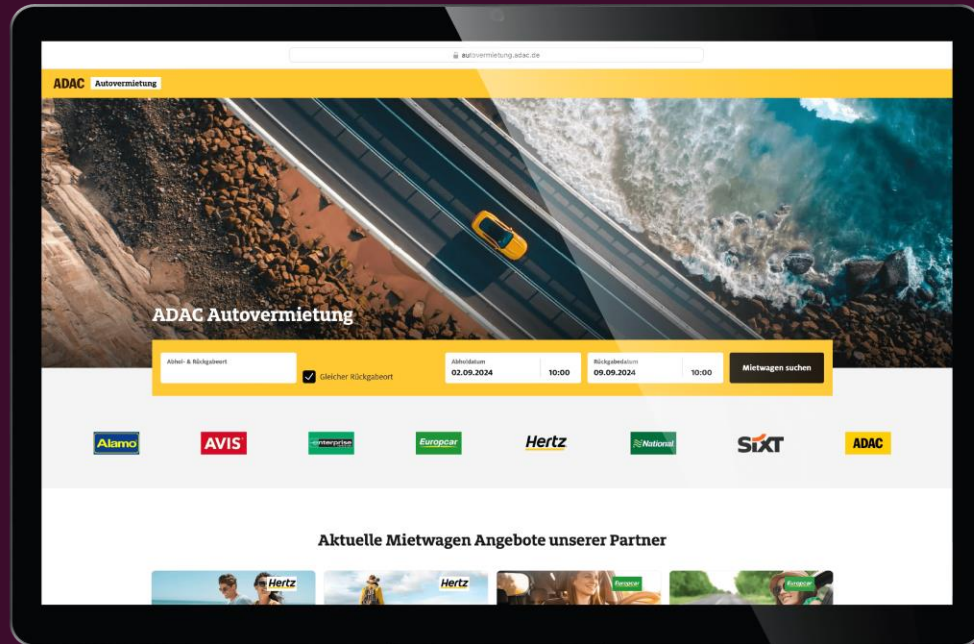

## Toll and Vignette Sales

Offline and Online for over 30 years

# ADAC Car Rental's Path to Headless

# Website Relaunch

*Conclusion:* Headless CMS was necessary

The website relaunch was the basis for *further technological developments*.

*Main Goal:*

Further development of the website in terms of

- 🔗 Usability
- 🔗 Website technology
- 🔗 Expansion of our digital strategy (SEO/GEO, Personalization)

*Requirements:*

- 🔗 Omnichannel & Content Re-use
- 🔗 Performance & SEO (e.g. shorter loading times)
- 🔗 Efficient workflows (between IT & Content)

# Members/customers expect personalization

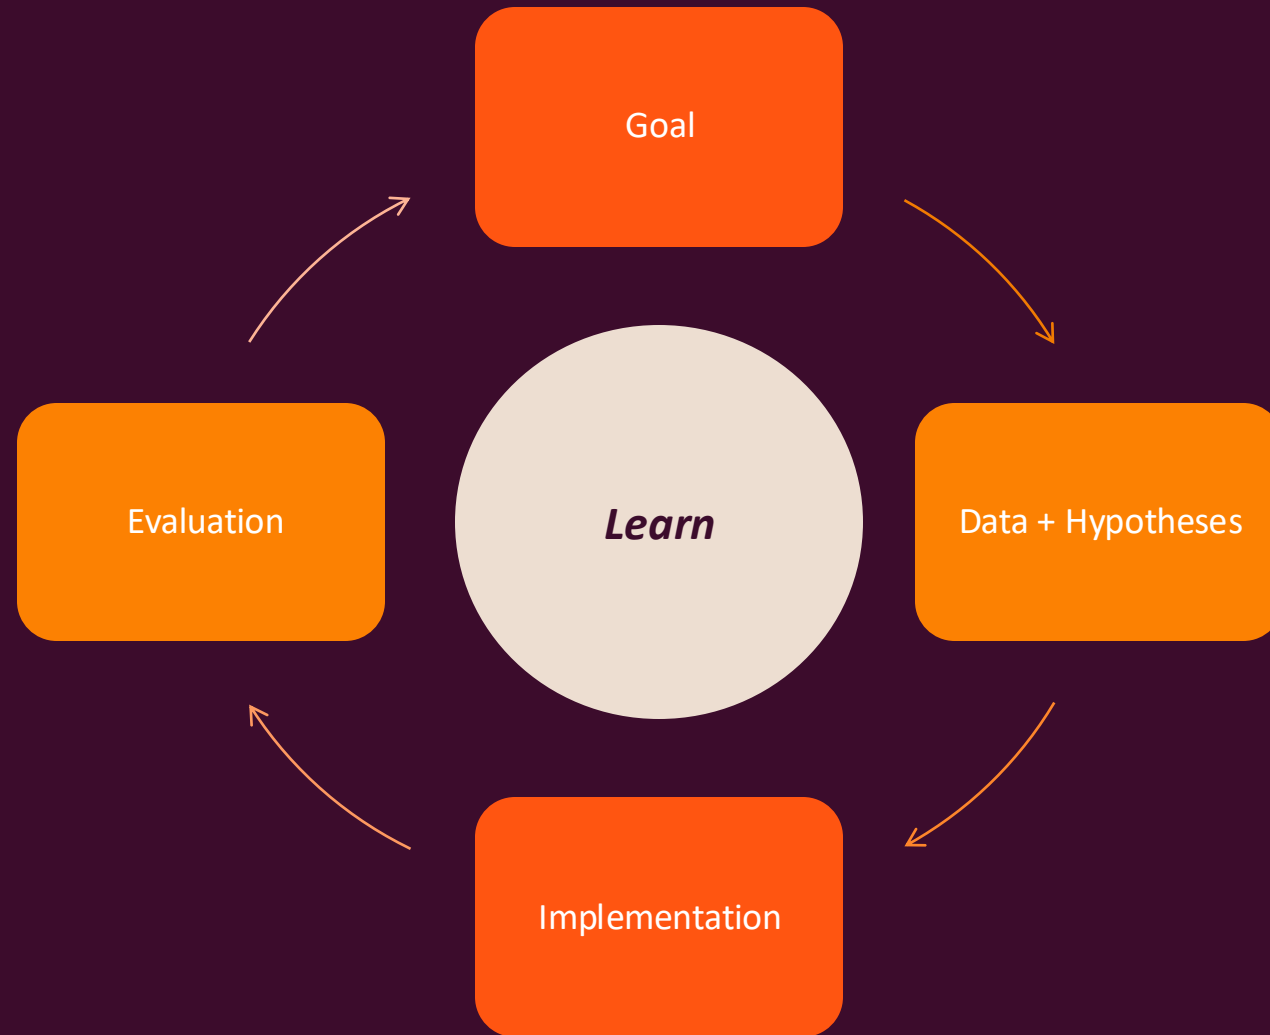

*Challenges, trends, and development*

100 %

Quelle: *Forbes*

# Hypothesis Workshop

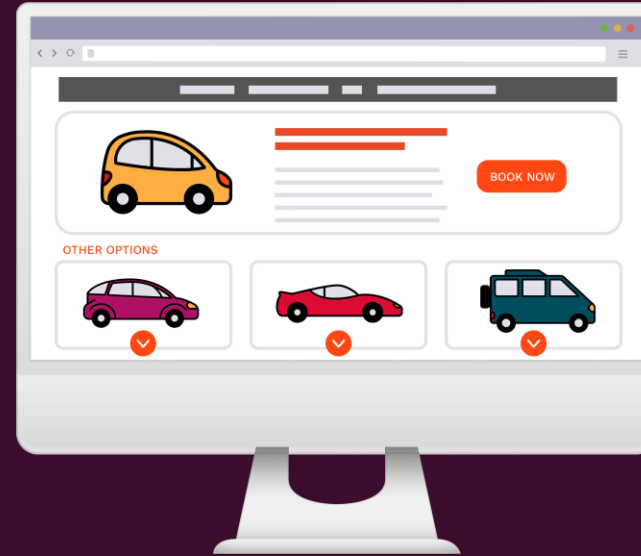

# Personalization approach

A user visits the shop,  
*browses through several  
pages*, searches for available  
offers, and rents a car.

The personalization  
technology tracks the  
*user's on-site behavior*.

On the next visit, the  
solution *recommends  
complementary products*.

*The customer purchases the  
recommended products and  
keeps returning to buy more.*

# Developing a roadmap for personalization

**Idea**

Development of use cases based on corporate goals

**Hypothesis**

Formulation of hypotheses and associated goals

**Prioritization**

Evaluation of hypotheses according to complexity and added value

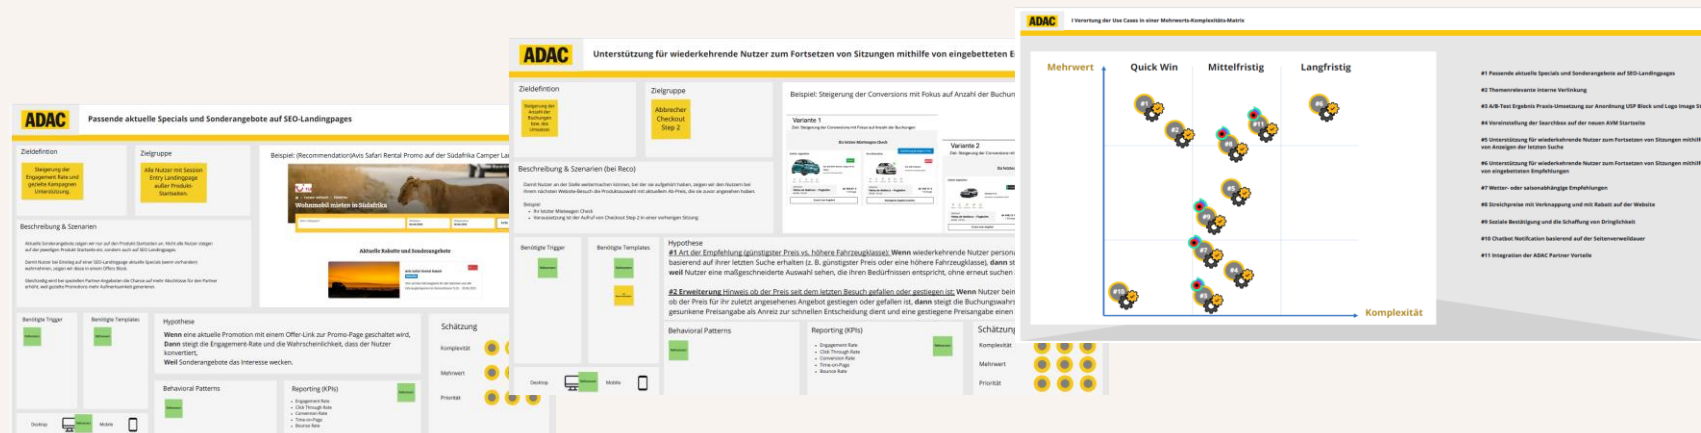

**Marketing Activation**

Setup KPIs and rules for control

**Monitoring**

Setup reporting

# Version 1

**Goal:** Increase conversions with a focus on the number of bookings.

# Vision ADAC fully embedded in an AI-Driven world

- 🔗 ADAC positions itself as a trusted mobility partner for humans and machines
- 🔗 AI agents automatically recognize, understand, and recommend ADAC offers
- 🔗 Data quality, transparency, and machine-readable information as key factors

## 1 *Visibility in AI Systems:*

Machine-readable product data, semantic SEO, trust signals

## 2 *Omnichannel Brand Experience:*

Integration into voice systems, conversational interfaces for car rental inquiries

## 3 *Personalization & AI-Powered Services:*

Personalized offers, dedicated ADAC mobility coach, proactive recommendations

## 4 *Digital Brand Management:*

Defining brand identity for AI systems, trusted advisor for personal assistants
